

Lene Tranberg

JURN JORN UTZON
RESEARCH NETWORK

Lene Tranberg was born in 1956 and established Lundgaard & Tranberg Architects with Boje Lundgaard in 1985, which they managed and developed together until 2004. The office is now run by Lene in collaboration with 6 partners, employing 45 persons.

Lene is actively involved in the design all of projects as well as the general management of the firm. Lene is adjunct professor at the Royal Academy of Fine Arts in Copenhagen and has served as visiting professor at The University of Washington, Seattle.

Lene is honorary member of the American Institute of Architects (AIA).

Lene's professional commitment has resulted in a number of critically acclaimed and prize-winning built projects. The work of Lundgaard & Tranberg is characterized by a sensory approach to the space of architecture, with flowing transitions between building and landscape, in and out, activating new identities and relationships within the urban context

LUNDGAARD + TRANBERG

Lundgaard & Tranberg Architects is a leading Danish architectural office, practicing architecture, urbanism, landscape, product and furniture design.

For over more than 20 years, Lundgaard & Tranberg have gained renown through participation in competitions and the realization of a wide range of projects, positioning themselves as one of Denmark's most renowned and award winning architectural offices.

The office has also taken part in a series of research and pilot building projects focused on the improvement of building products and processes, with a concentration on sustainable housing.

In addition to being known for innovative and original architecture, the office has established a reputation for leadership and collaboration in project realization.

Lundgaard & Tranberg Architects' work has won various national and international prizes and has been published in books and periodicals worldwide.

For three years running, the office has received the prestigious 'RIBA European Award' from the Royal Institute of British Architects; in 2006 for the Copenhagen Business School faculty building, in 2007 for the Tietgen Dormitory, and in 2008 for the new Royal Playhouse in Copenhagen.
