Constructive
Mentoring Program

Victorian Chapter Application Form — 2019

Australian
Institute of
Architects

The Australian Institute of Architects Victorian Chapter

2019 Constructive Mentoring Program

Constructive mentoring provides personalised guidance and support to young graduates and those re-entering the workforce from a mentor drawn from the architectural profession. The Victorian Chapter offers a 12 month program and will match a practising architect mentor with individual members who wish to gain a broader perspective on the architectural profession.

Benefits for mentors include:

- Supporting the industry and the people in it
- Sharing knowledge, experience and management skills
- Demonstrating leadership capabilities while helping others develop personally and professionally

Benefits for mentees include:

- Discussing your personal career development path
- Assessing the needs and goals of your personal business plan
- Improving your ability to plan for the future
- Gaining a broader perspective of the architectural community
- Networking and learning from the experience with others in your industry

Conditions of participation:

- Mentors and mentees are to be members of the Australian Institute of Architects and must maintain membership throughout the duration of the program
- Mentors are to be Member Level 1 members of the Australian Institute of Architects residing in Victoria with a minimum of four years post graduate experience
- Mentees are to be recent Graduate Institute members or mature age female Institute members re-entering the workforce, who have not previously been involved in the program

**Please note that application for the 2019 Constructive Mentoring Program is not a guarantee of a place. In the event of an excess of mentee applicants placements will be awarded on a needs basis.*
