

WORKSHOP ARCHITECTURE

New Project Architect Required

Workshop Architecture is looking for a new revit capable, design focussed, practical and inventive project architect of around 3-5 years experience to run smaller projects, play a significant support role in larger projects and contribute positively to the culture and capability of our practice... the role is to replace an existing architect with qualities as described above who is leaving us to pursue a specialised role in a larger practice... we are currently 9 people with a variety of projects on our books from boutique residential to small commercial to a variety of large and small educational and community projects... if this sounds appealing, please send introductory email with CV to mail@workshoparch.com.au
