

REVIT ARCHITECTURAL DOCUMENTER

H A C H E M

Have you been using Revit consistently throughout your career and attained an expert level of fluency with the program? Do you have specific experience working with collaborative models? An opportunity for a Revit Architectural Documentor has become available in our multi-award winning architecture design firm.

Your new company

Our bustling design studio services a diverse range of clients including large scale developers; education and health sector clients; environmental companies, and private enterprise. Our projects range from high concept hospitality and bespoke hotels, to unique multi-residential developments, boutique residential design, and educational and medical facilities.

Your new role

We are looking for an advanced Revit architectural documentor to join our highly creative studio. This position will see the successful candidate work across various projects to manage the Revit implementation in our office. You will be responsible for the set up of revit files, managing the libraries and families and help troubleshoot revit issues amongst the team. Ideally you will contribute to the training and mentoring of staff in the use of Revit. Successful candidates will also have good knowledge of the construction industry.

- Coordinating the BIM for Project submissions, construction models and schedules
- Assisting in the resolution of BIM design issues and preparation of sketch design, modelling, construction documentation and detailing on specific projects as required.
- Management and distribution of digital documents to the project team
- Help, maintain and improve the Revit system
- Provide training and mentoring to employees
- Ability to troubleshoot Revit issues

What you'll need to succeed

- Extremely proficient in Revit and BIM Model Management, with sound knowledge of building, creating and maintaining Revit families
- Specific experience working with collaborative models in Revit.
- 3-8 years of continuous Revit experience within an architectural company
- The ability to develop and implement BIM standards, and identify inefficiencies in projects
- Great work ethic and strong communication skills
- Detailed understanding of Australian construction processes, systems and facility detailing
- Proven experience in mentoring and providing training and development to employees
- Driven and motivated in your career
- Ability to convert Rhino to Revit on complex projects is desirable

What you'll get in return

This newly created role is a genuine opportunity for the right candidate to join a highly original design studio. We are not your average run of the mill design firm. We specialise in high-end bespoke design solutions. Competitive salary on offer dependent on experience.
