

30 January 2018

Senior Architect (Full-Time or Part-Time / Casual)

Are you passionate about contemporary and sustainable architecture ? Feel that documentation is part of the design process? Then you could be a great fit.

We are a multi-award winning small practice, working from a fun environment in the heart of Collingwood. We are in the process of going from being a 'start-up' to becoming an established practice. A lot of our work is residential and/or interiors-based, but we are also involved in commercial and institutional work - and most of our projects end up winning an award.

To help growing, we are looking for a new team member, a design-driven candidate, as excited about sustainable and contemporary design as we are, and with sound technical knowledge and great experience under her or his belt.

You should be a quick thinker and an excellent communicator, and

- be experienced in successfully running projects
- be experienced in documenting highly crafted projects
- be able to work directly with and in-between the directors and the team
- ideally be registered as an architect in Australia
- have local experience with planning and building regs
- have a total minimum of 4-10 years experience (or more)
- be passionate about what you do and
- have an eye for design and detail

Due to current workload, the role will start off with a focus on documentation, but with the right person on board we'd love for it to evolve into something bigger, and to encompass various stages and as many aspects of architecture and design as possible. Salary is commensurate with experience.

If this sounds like you, we'd love to hear from you. Please send your response to hr@MelbourneDesignStudios.com.au , outlining your skills, experience and thoughts about how your abilities may add value to MDS. Applicants must be eligible to work in Australia. Any questions in the interim, please feel free to call the office, or Felicity directly on ph 0403 611 217.

We look forward to hearing from you,
The Team at Melbourne Design Studios (MDS).
