

## Graduate of Architecture position

We are seeking an enthusiastic graduate of architecture with between 1-2 years of post-graduate experience to join our growing team. This is an on-going full-time position and you will be working closely with the director and experienced architects to utilise and develop your skills to deliver successful projects.

RBA architects are an award-winning, multi-disciplinary practice located in Fitzroy Street St Kilda. We are a research-based practice and have an intellectual approach to our work, producing well-crafted and refined architectural outcomes. We are a small office and as such you will have the benefit of exposure to a variety of projects across a wide range of scales, including heritage + conservation, adaptive re-use and new design projects.

We are after a self-motivated, documentation whiz who is able to work autonomously, as well as within a team. You will have a design focus and attention to detail and have excellent organisational and project management skills. You like to get things done, are confident and have excellent presentation and communication skills, enabling you to liaise with team members, consultants and clients in a professional manner. We encourage active collaboration in project teams to achieve innovative and creative architectural design solutions. You be exposed to various project stages contributing to design meetings, preparing town planning packages and assisting with tender documentation.

A good working knowledge of AutoCAD, Photoshop, Illustrator and Sketch-up is essential. Other programs such as Revit, 3DS Max and Rhino will be looked at favourably. Experience with the preparation of town-planning packages, Rescode knowledge, and a keen interest in heritage architecture is also an advantage.

Salary is to be commensurate with experience.

If this sounds like you, we would like to hear from you. Please email your cover letter, CV and portfolio of work (Max 5mb) to Roger Beeston (Director) [roger@rbaarchitects.com.au](mailto:roger@rbaarchitects.com.au).
