

## **MERRYLEES ARCHITECTURE**

### **Talented and ambitious architects wanted!**

#### **\$\$\$ Generous for experience**

We are looking to fill two exceptional roles within our boutique studio at Merrylees Architecture in Ripponlea Village.

#### **Senior Project Architect Position**

This opportunity will satisfy the most career hungry, highly skilled and motivated design experts out there! Our young studio has been growing steadily over the past 24 months and we are now in a position where we need your help on some incredibly exciting high-end residential and aged care projects. You know you are right for this role if you exude confidence working across *all* project stages from inception to completion (honestly, this is a must), you can take a project by the horns and really impress your peers with your design skills, you have the local Melbourne residential architecture scene all figured out and, best of all...you're looking for a leadership opportunity. Perhaps you've dreamt of running your own business one day? Here is your opportunity to dip your toe in the water without taking on the hassle and risk of going solo with the potential to work towards a stake in the business.

#### **Mid-level Architect or Graduate of Architecture min 5 years experience**

We are looking to fill a maternity leave role for minimum term of 6 months, possibly longer. This role would suit an experienced candidate with the option to work part time. Experience in aged care and high-end residential architecture is essential.

We are a small team, office hours are flexible and relaxed, but we really need dedicated high achievers who have aspirations to run their own projects, mentor junior staff and assist the Director in running the business.

Please only apply if you meet the above criteria and happen to be handy on Revit / AutoCad and 3D SketchUp.
