

Project Architect

We are seeking a project architect to coordinate a number of new projects in the office.

You will need at least 5 years post grad experience and demonstrated experience in the role of project architect.

We need you to be proficient in AutoCAD and keen to share our interest in, and contribute to high caliber public architecture and interior design.

We are not a large practice and our Collingwood studio is well known as a great place to work.

You will be working alongside the design director and practice associates, and be able to direct architectural assistants.

You will also need experience in contract administration and on site. This position is an opportunity to play a significant role in our new work in the realms of Tertiary Education and other Institutional clients.
